Subject Fw: CC Paragraph Updates (R10) - Midyear FY08

As a reminder, I need these by COB tomorrow, April 30, so regional management can review them before HQ's deadline. The Taylor, Oeser, and Pasco paragraphs need to be updated and Harry needs to write a new one for Umatilla. Thanks.

Subject CC Paragraph Updates (R10) - Midyear FY08

Region 10:

It is time to update the three-year planning construction completion candidate site paragraph information . For this particular effort, we are requesting updated information on the sites planned for construction completion in CERCLIS for FY08-FY11 or sites that were previously planned for CC for FY08-FY10 (October 2007 CERCLIS data pull) that have now been moved into the future.

In an attempt to minimize the work required on your part, I am providing the following electronic files for your use.

1. This excel file has a list of the sites we are requesting information for this update (Worksheet #1). This list was based on the planned construction completion candidates data in CERCLIS as of 04/07/2008. The fiscal year information highlighted in bold represents a change in CERCLIS planning date from the previous paragraph CERCLIS data pull from October 2007. If a date is in bold, please include some information in your paragraph briefly explaining the reason for the change in planned CC fiscal year .

*Just to serve as a reference, I've also included planned construction completion fiscal year dates for all of the remaining final or deleted NPL sites in your Region which are not currently construction complete (Worksheet#2 by Date, Worksheet #3 by Site, Worksheet #4 by State). Hopefully, this can be a useful tool to assist with maintaining the highest quality of construction completion planning information in CERCLIS .

2. The following word file includes the previous paragraph language submitted from the October 2007 update for the sites that are part of this most recent request. The paragraphs are arranged in the order of candidates as presented from Worksheet #1 of the excel file. Please update this information and/or provide revised paragraphs as appropriate using this format and file . For those projects where a paragraph was not previously provided, please provide the same type of site information as those previously provided. As a reminder, we are looking for concise information on activities necessary to achieve construction completion at the site , discussion of estimated schedules and time frames for key milestones or decision points necessary for completion , and a description of any issues that could affect the planned schedule. Also, please be sure to update CERCLIS so that the candidates for each fiscal year from the paragraphs you submit match the planned fiscal year for the PCOR/FCOR in the CERCLIS site schedule.

[attachment "R10 cc.doc" deleted by Rod Lobos/R10/USEPA/US]

We are requesting for this single word document with updated site paragraphs be sent to me and Rafael Gonzalez by **COB Monday, May 5, 2008**. It is important that we get this information on time in order to prepare for both the Regional Midyear Meetings starting in May and the end of May Division Directors meeting in Baltimore. If you believe you will have a problem making this deadline , please let us know as soon as possible.

In the meantime, feel free to give me a call if you have any questions or suggestions . Thanks for your time and attention to this exercise.

Richard, 703-603-8749
